RECYCLED COMPOST

Recycled Compost is a true organic compost blended from 100% recycled plant material and wood waste. It is rich and dark in color and has a pleasant, earthy aroma. Compared to other soil amendments, organic matter content and nutrient levels are high. It contains beneficial microorganisms to stimulate the soil environment. Promoting the use of recycled compost benefits us all, by reducing the amount of material going to our landfills. Certified Organic compost is also available. Call for current lab reports.

SPECIFICATION GUIDELINES:

Soil amendment shall be a stable, green waste compost, free of undesirable contaminants and shall be dark brown to black in color with an acceptable odor. Compost shall conform to the following:

Source material	Green Waste
Organic matter	Minimum 250 lbs./cy
Carbon to Nitrogen ratio	Maximum 35:1
pH	5.5 – 8.0

Salinity levels - Sodium shall account for no more than 25% of the total. Salinity of amended soil shall not exceed 4.0 dS/m based on soil tests, amendment Ece and estimated Ece increases.

Particle Size	<u>Percent Passing</u>	<u>Sieve Size</u>
	100	3/8"
	95-100	1/4"
	80-100	No. 4
	60-100	No. 8
	20-70	No. 18
	0-30	No. 35
